PROFILE

Web developer since 2023, focused on backend development with Java and Spring Boot. I work on the backend of a Telegram bot with 5M+ users.

SKILLS

Languages	Java · SQL
Backend	Spring Boot · REST · MyBatis · Flyway · Bean Validation · Concurrency (java.util.concurrent)
Databases	PostgreSQL · MySQL
Testing	JUnit 5 · Mockito · MockMvc · Testcontainers
Tools	Git · Gradle · Docker · Linux · SSH
Frontend	HTML · CSS · JavaScript (basic)

PROJECTS

Telegram game bot (production) 2026 – present
5M+ users, 285k active games · Java, Spring Boot, PostgreSQL

- Redesigned data persistence: changes are accumulated in memory using concurrent data structures and flushed to the database in batches (write-behind).
- Optimized a statistics report from 92 s to near-instant.
- Sped up bulk messaging to 200k+ recipients with batched database writes.

REST API for my website's contact form github.com/vpodymskiy/cv-backend
Java 25, Spring Boot 4, Docker

- Input validation, email delivery and tests; deployed on Google Cloud Run with Docker.
- Migrated to Java 25 and Spring Boot 4.

EXPERIENCE

Soluciones Web 365 SL 2023 – present
Web Developer, Valencia

- Custom plugins and modules for WordPress and PrestaShop (PHP, MySQL).
- Automated SEO workflows with external APIs and AI.
